

“Never More Than a Page to Ponder!”

National NEMO Network Interagency Work Group

Quick & Painless Update February 2001

New NEMO Web Site

We have completely overhauled our Web site at:

<http://nemo.uconn.edu>

The emphasis is on better organization and easier navigation. The Work Group now has its own page, as part of the National Site, at:

<http://nemo.uconn.edu/NewNatl/interag.htm>

We welcome any input on the site, and would especially like suggestions for the Work Group page.

Partnership with Center for Watershed Protection

In February, we took another step in our growing partnership with CWP by signing an M.O.U. with Executive Director Tom Schueler. For those of you unfamiliar with Tom or CWP, they are a leading force in the world of urban stormwater management. CWP and NEMO are working on a number of collaborative projects, from individual workshops to much larger items...more to come.

Presentations Catalyzed by the Work Group

As a result of your support, there are a few notable NEMO presentations coming up in the DC area. Thanks to all of you who helped make these things happen, and please contact me if you want more info:

- 3/20/01: *USDA National Agricultural Research, Extension, Education and Economics Advisory Board Symposium.*
- 3/28/01: *NOAA Coastal Program Managers Conference*

NEMO Cyber Articles

These were accomplished via Work Group assistance.

“NEMO program provides tech assistance.” National Association of Counties (NACO) County News Online 33(4), February, 2001. (Written by Work Group member James Davenport).

<http://www.naco.org/pubs/cnews/current/nemo.htm>

“Educating Local Land Use Decision Makers to Improve Water Quality in Connecticut.” Coastal Services magazine, published by the NOAA Coastal Services Center. January/February 2001.

<http://www.csc.noaa.gov/magazine/2001/01/conn.html>

Next Up

- newly funded NEMO Projects from around the country.
- news on the National Sea Grant *Coastal Community Development Program*.
- update on “NEMO-U2,” coming next Fall in Charleston, SC.
- new image serving and interactive mapping on the NASA RESAC/NAUTILUS Web site.
